

# power of integration

## Integrating Access Control and Video Surveillance Solutions.

Honeywell's Access and Video Systems brings the power of integration together like never before. By combining Honeywell's new WIN-PAK™ 2005 or NStar access control software with Rapid Eye Multi Video Systems, we offer Digital Video Integration from a single, simple-to-use platform – giving you greater capabilities and the power to interface seamlessly. With Honeywell's

Digital Video Integration, you can capture and verify live video and tie it to an alarm event, generate video pop-ups as the event occurs, and we even give you the power to pan, tilt, zoom and monitor up to 16 cameras at a time. Plus, no additional upgrades are needed to expand the system. At Honeywell, we make it possible for you to scale up when needed; it's the power of integration. It's the power of Honeywell.
